

WHEAT International trial: Withholding milk feeds around blood transfusion

WHEAT International is trying to find out how best to care for babies born more than 10 weeks early and who need a blood transfusion

For more information scan here

We are comparing two routine ways of caring for babies around the time they have a blood transfusion

**Pause milk feeds
around
transfusions**

OR

**Continue milk
feeds around
transfusions**

If you DO NOT want your baby to be part of the WHEAT International trial please talk to any doctor or nurse
